The Board discussed the possibility of allowing licensees to take on-line continuing education courses.

Mr. Papademas stated that Mr. Delassandro sent him a sample on-line course entitled Barrier Free. Mr. Papademas also stated that the computer calculates the amount of time the student is in attendance to ensure that the student is logged on. The students can push a button and ask a question which the instructor will answer.

Mr. Papademas also stated that he will take the full on-line course shortly.

Mr. Flaherty stated that when he attends a seminar, he is asked for picture identification; how does the sponsor/instructor know that the person on the other end of the computer is actually the licensee taking the course.

Mr. Malec stated that the training is for the benefit of the licensee. It will be the electrical contractor's loss if he is not taking the course.

Mr. Malec also stated that the instructor does ask questions and if the licensee does not respond, a light will come on alerting the instructor.

This matter is being held in abeyance pending a report from Mr. Papademas.

The Board reviewed applications for the written examination to be administered by Prometric. Twenty-two (22) applications were approved.
